

# SYMPOSIUM ON PRELIMINARY PREPARATION, PROSECUTION, AND LITIGATION IN INDIA, U.S., AND EP WITH FOCUS ON SOFTWARE, ELECTRONICS AND MECHANICAL PATENT PORTFOLIO

## ABOUT THE SYMPOSIUM:

With Patents becoming a core part of existing economic ecosystem, particularly for Software, Information Technology, IoT, Embedded Systems, and Telecom industries, exploitation of Patent Portfolio has become an industry in itself, especially with the cost of development and protection of the portfolio being enormous. It is therefore crucial to understand important Patent issues, not only by In-House IP Counsels but even more importantly by R&D Scientists so as to minimize efforts in Patent Development, and maximize commercial gains. It is crucial to understand nitty-gritty's of patent portfolio creation, protection, management, and commercialization, without which there would always remain an open door for a serious blow either from an infringement perspective or from a patent invalidation perspective or the portfolio would remain under-commercialized. Exclusivity rights granted through patents can only be utilized if there is comprehensive knowledge of various patent related issues, more so when National Patent Laws & Practices relating to prosecution practices, drafting practices, examination practices, enforcement practices and commercialization practices differ substantially across geographies. Furthermore, with growing clarity concerns on Software Patentability in India, and new guidelines coming out for Computer related Inventions (CRI), it is imperative to understand how such guidelines are actually being implemented in real-life Patent applications. Sessions of the Symposium would also help understand how Indian Companies Strategize in view of the dynamic policy changes in the software industry.

Lastly, with a number of cases being filed these days on FRAND issues, it is very critical for all concerned stakeholders to understand how such litigations may impact them, how [EP] are being interpreted and challenged these days, along with how Competition Commission and other like regulatory bodies are handling complex royalty rate and unfair competition issues. The Symposium would answer clearly on all issues mentioned above and much more.

## WHY ATTEND:

This is an opportunity when Patent Experts, Litigators, and Legal Counsels from varied backgrounds and having enormous expertise carrying different perceptions would be interacting with limited delegates, and would answer any question that the delegates may have. The speakers have thorough knowledge on the subject and have been working in the field for many decades. The speakers are selected such that R&D Scientists, In-House Counsels,

Patent Attorneys, and IP Practitioners can get to know realinsights and nitty- gritty's followed in India and by Global Companies Developing Indian Patent Portfolio and Managing Large R&D Centers. The speakers would share real- life cases and experiences that can help attendees in following best practices for building their respective patent portfolios so as to best commercialize.

## HOW THE SYMPOSIUM IS UNIQUE:

The proposed symposium is represented by a very strong and top- notch line-up of speakers from Law Firms, wherein such speakers come from a variety of different backgrounds such as from Software, Electronics, and Mechanical Domains, and therefore offer a unique value proposition to the symposium attendees. The Symposium features presentation of important patent issues, as mentioned in this brochure. The speakers are a unique gathering of Patent Attorneys who have extensive years of experience in their professional fields and are well acquainted with the Industry's need. These speakers will put across, to the delegates, a real insight of Patent Laws, Interpretation of CRI guidelines, FRAND based issues for Standard Patents, best practices for prosecuting, licensing and litigating Patents/IPs, and Portfolio Development Processes/Strategies.
