

uChek™

The uChek app simplifies urinalysis. Using the phone's camera, color dipsticks, and the uChek peripheral kit, the uChek system can test for upto 10 parameters in urine: Glucose, urobilinogen, pH, ketone, occult blood, protein, bilirubin, nitrite, leukocyte, and specific gravity. The results may be saved, exported, shared and analyzed as a trendline over time. Urinalysis can help diagnose 25 medical conditions including diabetes, problems of the kidneys, liver, bladder and common infections like UTIs. **Currently available for iPhone 4, 4S and 5 at www.uchek.in**
