About the Webinar:

Khurana & Khurana, IIPRD and Marks & Clerk LLP (UK) have put together an Hour Session on Digital Personal Data Protection Act, 2023 in Practice: Lessons Learnt from GDPR. The topic is very pertinent at this juncture owing to DPDP coming in to an act. Accordingly, practical insights from a European/UK Attorney, based on several real-world GDPR enforcement actions and case studies across the EU, will help highlight the key practical challenges associated with implementation, compliance, monitoring, and enforcement of data protection laws.

The webinar will attempt cover:

- Salient features of DPDP Act 2023 : Understand the key obligations under Digital Personal Data Protection Act, 2023 and their practical implications for Indian businesses.
- DPDP and GDPR: Key Overlaps and Material Differences: Learn how the DPDP compares with the GDPR, and why GDPR enforcement trends are relevant for Indian compliance planning.
- Lessons from real-world GDPR Case Studies : Explore real-world GDPR case studies and enforcement actions relating to consent, transparency, employee data, security failures, and cross-border transfers, and the compliance lessons they offer for India.
- Building a Practical DPDP Compliance Roadmap : Gain a practical DPDP readiness, covering data mapping, privacy notices, consent architecture, retention practices, grievance redressal, breach-response mechanisms, and vendor management. Identify and understand key high-risk areas such as children's data, HR data, cloud hosting, intra-group data sharing, and third-party processing. Understand why DPDP compliance requires continuous governance, audit trails, accountability, and operational readiness rather than a one-time privacy policy update.

The webinar aims to equip legal professionals, compliance officers, in-house counsel, startups, technology companies, healthcare entities, financial institutions, and data-driven businesses with actionable strategies to navigate India's emerging data protection regime with confidence and foresight

About the Speakers:

Eleonor Duhs

Eleonor is an internationally recognised expert in the field of data protection law. She was the UK government's lead lawyer in the negotiations on the GDPR. Eleonor Duhs is a partner in Marks & Clerk's AI & Cyber Security legal advisory practice. She is a Barrister and the Head of Data & Privacy. Eleonor advises on all aspects of data protection law including data protection aspects of AI, personal data breaches, international data transfers, data protection impact assessments, data sharing, data subject rights requests and anonymisation.

Tarun Khurana

Tarun has over 23 years of experience in a broad range of Intellectual Property subject matters.
